Tone:	Professional, friendly, reassuring – like a trusted healthcare advisor

...

SECTION 4: EXAMPLE BUSINESS – DENTAL CLINIC, DELHI

4A. Primary Keyword Research

Attribute	Detail
---	---
Primary Keyword	best dental clinic in Delhi

SECTION 1: PROJECT OVERVIEW

Project Objectives

1. Design a reusable, variable-driven Master Prompt that generates complete SEO content packages
2. Demonstrate the system's effectiveness using a real business scenario (Dental Clinic, Delhi)
3. Create a full content cluster strategy with 10 supporting articles
4. Build an internal linking blueprint that SEO professionals can implement directly
5. Develop local SEO variants for three Delhi neighborhoods
6. Package everything in professional GitHub-ready documentation format

Expected Outcomes

- A plug-and-play SEO prompt system usable by any business in any industry
- Demonstrated 80%+ reduction in content creation time compared to manual writing
- A complete, publish-ready SEO blog post (~1,400 words) on dental care in Delhi
- A 10-article content cluster plan that can drive 500-2,000 monthly organic visitors
- Local SEO metadata for Rohini, Pitampura, and Janakpuri that targets neighborhood-level searches

SECTION 2: TOOLS USED

Tool	Version/Plan	Role in This Project
--- --- ---		
ChatGPT	GPT-4o	Primary long-form blog generation, FAQ writing, content ideation
Claude	Claude Sonnet	Outline structuring, meta description optimization, tone refinement
Gemini	Gemini Advanced	Keyword research, search intent mapping, local SEO variant generation
Google Docs	Free/Workspace	Content drafting, collaboration, human review before publishing
GitHub	Free Tier	Version control, project documentation, portfolio submission

SECTION 1: PROJECT OVERVIEW

What is SEO?

Search Engine Optimization (SEO) is the practice of optimizing a website's content, structure, and authority so that it ranks higher in search engine results pages (SERPs) – particularly on Google. When someone in Delhi searches "best dental clinic near me," SEO determines which clinics appear on page one and which are buried on page five.

SEO encompasses three core pillars:

****On-Page SEO**** involves optimizing individual web pages through keyword placement, meta tags, heading structures (H1/H2/H3), image alt text, and content quality.

****Technical SEO**** covers site speed, mobile-friendliness, crawlability, XML sitemaps, and structured data markup that help search engines understand and index a site.

****Off-Page SEO**** builds a website's authority through backlinks from other websites, local business citations, Google Business Profile optimization, and social signals.

For local businesses like dental clinics, restaurants, law firms, and coaching centers, Local SEO – a specialized branch targeting geographic search queries – is often the highest-ROI digital marketing investment available.

1. SEO METADATA PACK

Generate:

- SEO Title (60 characters max, include primary keyword near the front)
- Meta Title (same as SEO title or slight variation, 50-60 characters)
- Meta Description (150-160 characters, include primary keyword, a benefit, and a CTA)
- URL Slug (lowercase, hyphens only, 3-6 words, includes primary keyword)

2. H1 HEADING

Write one powerful H1 heading that:

- Includes the primary keyword
- Is compelling and benefit-driven
- Is 60-80 characters long

3. COMPLETE BLOG OUTLINE (H1 / H2 / H3 Structure)

Create a detailed outline with:

- 1 H1 (the main title/heading)
- 6-8 H2 sections covering different aspects of the topic
- 2-3 H3 subpoints under each H2 where relevant
- Include: Introduction, Main Content Sections, FAQ Section, Conclusion, CTA

🗝️ THE MASTER PROMPT
